## Election/Restrictions

1) It is noted that applicants have elected to cancel claims 15-27 and prosecute claims 1-14.

## Claim Objections

2) Claims 6-13 objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

The aforementioned claims refer to the product being worked upon by the apparatus. That is viewed as a recitation of intended use and bears no weight to the structural limitations of capabilities of the apparatus being sought for a patent.

Furthermore the product produced by the apparatus as a result of the operation of the system is viewed as a separate statutory class of invention.

Examiner objected to these claims in the first action and applicant's have failed to address such issues in their response and therefore objection will remain in effect.

Claim Rejections - 35 USC § 103

Application/Control Number: 10/623,270 Page 3

Art Unit: 1722

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 3) Claims 1-14 rejected under 35 U.S.C. 103(a) as being unpatentable over Li (US PG Publication 2002/0111707) in view of Schmidt (US Patent No. 6,841,116).

Li 707 pertains to a solid freeform fabrication apparatus where it is taught to produce a three-dimensional object via solid free-form fabrication, wherein a dispensing system includes a radiation initiator and a build material alongside with a curing system to cure the materials once deposited from at least one ink-jet printhead (See Sections 0002-0011 and 0054).

Art Unit: 1722

Li 707 however may suggest that two materials are stored separately it does not explicitly teach it so.

Page 4

In a device related to solid freeform fabrication, Schmidt 116 teaches a selective deposition apparatus. Wherein that it has been known in the conventional art to have apparatuses that teach a dispensing system capable of including a various materials from build to radiation initiators, stored separately in the dispensing system, and dispensed separately from injection nozzles. Furthermore a curing system operative to cure the radiation initiator and the build material after each having been dispensed wherein the curing system comprises an ultraviolet curing system (See Figures 1 and 2 and Cols 2-3 Lines 1-68 Cols 12-17 Lines 1-68).

It would be obvious to one skilled in the art to modify the teachings of Li 707 with that of Schmidt 116, in order to prevent the two materials from interacting with one another until at the appropriate time of curing, or else if interacted sooner, then the desired result would occur in the system rather than once deposited from the system to create the desired three-dimensional object.

Application/Control Number: 10/623,270 Page 5

Art Unit: 1722

## Conclusion

4) Applicant's arguments filed 9/12/05 have been fully considered but they are not persuasive.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
